

Serial No. 10/584,465

Docket No. K-0820

Amendment dated August 5, 2010

Reply to Office Action of April 7, 2010

Amendments to the Specification:

Please replace the paragraph at page 1, lines 13-20 with the following amended paragraph:

The reciprocating type compressor is provided with a case 10, an electric driving part 20, and a compression part 30. The case 10 has an upper shell~~44~~ 12 and a lower shell~~42~~ 11, joined together to enclose an inside space of the case 10. There is refrigerating machine oil held in a lower part of an inside of the lower shell 11 to an appropriate depth for preventing wear of various machine components. The electric driving part 20 has a stator 21 for receiving a current to generate an electro-magnetic force, and a rotor 22 for generating a rotating force by the electro-magnetic force from the stator 21.
